Reasons for Allowance

Claims 1 and 2 are allowed.

Regarding claim 1, it is noted that the closest prior art of record, Bialik (U.S. Patent 6,389,006), teaches the handling of lost packets when transmitting compressed voice signal by using samples from the last good frame, but Bialik does not teach the more specific operation of synthesizing a portion of the speech signal corresponding to the unavailable packet using a portion of the previously formed speech signal, wherein the integer number of pitch period samples of the previously formed portion found in such synthesis is greater for speech of a fundamental frequency above a threshold than for speech of a fundamental frequency below the threshold.

Regarding claim 2, it is noted that the closest prior art of record, Bialik (U.S. Patent 6,389,006), teaches the handling of lost packets when transmitting compressed voice signal by using samples from the last good frame, but Bialik does not teach the more specific operation of synthesizing a segment of the speech signal corresponding to the unavailable packet including a portion of the previously formed speech signal, which portion corresponds to k pitch periods of the previously formed speech signal that are repeated to form a synthesis of said segment, where k is greater for speech of a fundamental frequency above a threshold than for speech of a fundamental frequency below the threshold.

Art Unit: 2654

Thus, independent claims 1 and 2 are allowable over the prior art of record because the cited prior art alone or in combination, does not fairly suggest or disclose the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons of Allowance."
